Assets

Team spirit

Stress resistant

Organized, punctual

Interests

Travel

- Lived in South Africa for 2 years
- Traveled to America, Asia and Europe as a tourist

Sport

- Competitive tennis (15/3)
- Bodybuilding
- Climbing (departmental competitions)

Music

- Guitarist for 15 years
- Lead guitarist in a band
- Self-taught pianist

Tanguy Ducrocq

Looking for an final internship

As a fifth-year engineering student at EPITA majoring in AI, I am looking for a 24 weeks (~6 months) internship starting in February 2026 in the field of artificial intelligence.

Education

EPITA

From September 2023 to July 2026 [EPITA](#) Paris
Engineering program – Class of 2026
SCIA-G major: Data Science, Artificial Intelligence, and Graphs

Prepa CPGE

From September 2021 to July 2023 [Sainte Marie](#) Antony
Field of study: MPSI/MP

Baccalaureate

From September 2020 to June 2021 [Lakanal](#) Sceaux
Specializations: mathematics and physics-chemistry
Electives: advanced mathematics and sports

Work experience

Mid-study Internship

From September 2024 to January 2025 [DiliTrust](#) La Défense

- Development of an intelligent agent in Python integrating the ChatGPT API to automate the generation of technical documentation, with a Slack interface and multi-source data scraping
- Classification of contracts via internal LLM using optimized multi-step prompts, to generalize document types not seen during initial training

Co-creator

Since April 2023 [StereNova](#) Paris
Founder of StereNova

- Event planning and equipment rental
- Business management

Walter/Bartender

August 2022 [Marius Café](#) Pornic

Warehouse worker

March 2021 [PSL France](#) M.I.N Rungis

Warehouse clerk in the Spare Parts department

August 2020 [Renault Retail Group](#) Paris

IT Project

Music Generation with NLP

Developed a music generation system using a BERT-based language model to generate note sequences conditioned on input chords

Road Accident Data Analysis Project

Processed and analyzed large-scale road accident data using ML models to predict accident severity and uncover key patterns through visualizations.

Project with company

Development of an AI-powered tool for automatically analyzing soccer matches (player and action detection) to generate statistics for amateur clubs.

C++

Tiger language compiler

C

Project 42sh: reprogramming a Shell

EPITA computer pool

- Java/JavaScript
- c/c++
- sql
